

Thinking of a move?

WHY NOT MUSKOKA LIFE — Muskoka has always been the idyllic vision that people in urban centres have in their minds when thinking about their retirement or making a move to a cleaner life. Tranquil lakes, rugged terrain and an abundance of four season recreational opportunities make this area the perfect place to retire or make the move to live permanently.

So, it's not surprising that many people are selling their city homes and using that money to buy in Muskoka where real estate is much less expensive and usually more land to sprawl out on. Usually the cost of living is much less in the region from property taxes to auto insurance. You can often find a property that offers no view of any neighbours and quiet and serenity. There are 3 small towns that are each different in cultural and amenities to consider, several villages dotting the region or there are the rural country areas too! Choosing where to buy a property in the area will depend on personal preference, desired amenities and recreation opportunities.

Rent a cottage, stay at a local resort or drive around the area to discover which area appeals to you.

The water and air is cleaner, it is not crowded or polluted, no annoying rush hour traffic, great amenities, good job opportunities, and you only have to drive a few minutes and yet another lake or river to explore. Schools are less crowded and a wide variety of recreation and sport opportunities for kids of all ages. Ample senior activities and a very lively arts and cultural movement in the area will keep you young at heart.

If I have piqued your interest in making a move to Muskoka, then let me help you find your dream property! I have 22 years experience as a real estate broker and have lived in Muskoka most of my life. I can share my knowledge, experience, passion and love of the area with you.
